SERVO PRESS MOULD GREASE

DESCRIPTION

Servo Press Mould Grease is a premium quality mixed soap base grease containing extreme pressure, anti wear & antioxidant additives.

Servo Press Mould Grease possesses excellent shear stability, high load carrying capacity, high oxidation stability and capability to provide protection against rust, corrosion and water wash out. This grease reduces the leakage through the side link bearings and side arm bearings because of its excellent structure and proper consistency.

APPLICATION

Servo Press Mould Grease is recommended for the lubrication of bush bearings of Tyre curing press operated in Tyre Industries. This grease is also recommended for use in boiler spreader, stokers etc.

PERFORMANCE BENEFITS

- Possesses excellent dispensing properties
- Protects machine elements from excessive wear
- Prevents welding and seizure of the moving parts
- Protects bearing elements against rust and corrosion
- Resists water wash out
- Reduces consumption of grease
- Good adhesive nature and reduces oozing out of grease through the side link
